National Center for Education Statistics

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

The 1980-81 edition of this annual Directory lists institutions in the United States and its outlying areas that are legally authorized to offer and are offering at least a one-year program of college-level studies leading toward a degree. The requirements and criteria for listing are stated in detail in the Introduction.

The information presented for each institution includes its telephone area code and number, address (including the ZIP code), congressional district and county in which it is located, CE identification code, entity number, date established, fall 1979 enrollment, undergraduate tuition and fees, sex of student body (men, women, coed, or coordinate), calendar system, control or affiliation, highest level of offering, type of program, accreditation, names and titles of principal officers, and a coded classification of principal officers functional area of responsibility.

In order to expedite publication of this Directory, institutions were asked to respond no later than November 21, 1980. Due to this earlier date, we regret certain institutions were not updated and have been so designated in the Directory listing. Further explanation of this may be found in the Methodology section of the Introduction.

This publication was prepared jointly by the Division of Eligibility and Agency Evaluation (DEAE) of the Office of Postsecondary Education (OPE) and the University and College Surveys and Studies Branch (UCSSB) of the Division of Postsecondary and Vocational Education Statistics (DPVES) of the National Center for Education Statistics (NCES). DEAE has sole responsibility for the certification of the eligibility and accreditation of institutions for inclusion in this Directory; UCSSB, for all other aspects of the survey in which the publication is based.

We would like to express our appreciation, especially, to the officials of the institutions of higher education whose responses made the Directory possible and to the coordination officials of the State education agencies who assisted in the data collection and the resolution of inconsistencies.

Francis V. Corrigan
Assistant Administrator
Division of Postsecondary and
Vocational Education Statistics

Paul F. Mertins
Chief
University and College Surveys
and Studies Branch

January 1981

Acknowledgments

This publication was made possible by the cooperative endeavors of large numbers of persons in the National Center for Education Statistics and in the Office of Post-Secondary Education. Persons who made contributions are worthy of particular note are Mr. Joseph M. Hardman and Mrs. Margaret W. Hansley of the Division of Eligibility and Agency Evaluation who provided the certification of the eligibility and accreditation of institutions for inclusion in this Directory.

Basic survey work was conducted under contract by VSE Corporation under the overall direction of Jack Z. Moore. Working on the survey were James P. Lurz, Henretta J. Splain, and Rita S. Larrabee.

How to Obtain More Information

Additional information about this report is available from Mrs. Carolyn R. Smith or Mrs. Geneva C. Davis, National Center for Education Statistics, 400 Maryland Avenue SW., Washington, D.C. 20202, telephone (301) 436-6425.

Information about the Center's statistical program and a catalog of NCES publications may be obtained from the Statistical Information Office, National Center for Education Statistics, 1001 Presidential Building, 400 Maryland Avenue SW., Washington, D.C. 20202, telephone (301) 436-7900.

Inquiries for survey forms and for related computer products, including computer tapes, and printouts should be directed to Data Systems Branch, National Center for Education Statistics, 1001 Presidential Building, 400 Maryland Avenue SW., Washington, D.C. 20202, telephone (301) 436-7944.

Introduction

Criteria for Listing in This Directory

This Directory lists institutions in the United States and its outlying areas (American Samoa, the former Canal Zone, Guam, Northern Marianas Islands, Puerto Rico, the Virgin Islands, and the Trust Territory of the Pacific Islands) that meet the following requirements:

- (1) They are legally authorized to offer and are offering at least a one-year program of college-level studies leading toward a degree;
- (2) They have submitted the information required for listing; and
- (3) They meet one of the following criteria for listing:
 - A. The institution is accredited at the college level by an agency that has been listed as nationally recognized by the Secretary of Education; 1/
 - B. The institution holds preaccredited status at the college level with a designated nationally recognized accrediting agency; 2/
 - C. If the institution is public or nonprofit, it has qualified under the "three-institutional-certification method" established by Section 1201 (a) (5) (B) of the Higher Education Act of 1965. By this method, the Secretary of Education verifies that not fewer than three accredited college-level institutions have accepted and do accept an unaccredited institution's credits,

upon transfer, as though coming from an institution accredited by a nationally recognized accrediting agency.

"College-level" means a postsecondary associate, baccalaureate, post-baccalaureate, or rabbinical education program.

Institutions listed in the Directory are asked periodically to reestablish their eligibility for listing.

Accreditation

The responsibility for the control or supervision of educational institutions in the United States is not concentrated at any single level of government or in any public or private body or agency. Varying degrees of control are exercised by each State, but institutions of higher education operate with considerable autonomy and self-governance. Therefore, U.S. educational institutions vary widely in the character and quality of their programs.

A unique feature of U.S. educational practice is the process known as accreditation, which includes voluntary self-evaluation by a school and appraisal by a group of its peers. This process operates through nationally recognized accrediting agencies and associations and certain State bodies. These agencies or associations have established educational criteria to evaluate institutions in terms of their quality and to ascertain what quality are be

¹ See list under "Accreditation".

² See definitions under "Preaccredited Status" on page xlii.

provide institutions with continued stimulus for improvement to insure that accredited status may serve as an authentic index of educational quality.

Nationally Recognized Accrediting Agencies and Associations

The U. S. Secretary of Education is required by statute to publish a list of nationally recognized accrediting agencies and associations which the Secretary has determined to be reliable authorities concerning the quality of education or training offered by educational institutions or programs. In order to carry out this recognition function, the Secretary has established criteria for listing nationally recognized accrediting agencies and associations. The Advisory Committee on Accreditation and Institutional Eligibility assists the Secretary in determining which accrediting bodies should be listed. Accrediting bodies that achieve initial recognition are reviewed at least every four years thereafter.

Regional Accrediting Commissions -

Institutions with liberal arts and general programs and, in some cases, those with special programs may be accredited by an accrediting commission of one of six regional associations of colleges and schools. Regional accreditation applies to the entire institution. It signifies that each of the constituent parts of an institution is contributing to the achievement of the institution's objectives, although not necessarily all on the same level of quality.

The recognized regional commissions are indicated throughout this Directory by the following abbreviations:

EH	New England Association of Schools and Colleges, Commission on Institutions of Higher Education
EV	New England Association of Schools and Colleges, Commission on Vocational, Technical, Career Institutions

M	Middle States Association of Colleges and Secondary Schools, Commission on Higher Education
NH	North Central Association of Colleges and Schools, Commission on Institutions of Higher Education
NW	Northwest Association of Schools and Colleges, Commission on Colleges
SC	Southern Association of Colleges and Schools, Commission on Colleges
WC	Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities
WJ	Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges

JEH, JM, JNH, JNW, JSC, or JWC
Indicates a 4-year college accredited by the regional association as junior college.

National Institutional and Specialized Accrediting Bodies -

Specialized accreditation normally applies to evaluation of programs, departments or schools which usually are parts of a total collegiate or other postsecondary institution. The unit accredited may be as large as a college or school within a university or as small as a curriculum within a discipline. Most of the specialized accrediting agencies review units within a postsecondary institution which is accredited by one of the regional accrediting commissions. However, certain of the specialized accrediting agencies do accredit professional schools and other specialized vocational or other postsecondary institutions which are independent in their operations. Thus, a specialized or programmatic accrediting agency may also function in the capacity of an institutional accrediting agency. In addition, a number of specialized accrediting agencies accredit educational program within non-educational settings, such as hospitals.

Professional and specialized schools and programs are accredited by the following nationally recognized agencies and associations:

ADNUR	National League for Nursing: associate degree program in nursing	CLPSY	American Psychological Association: clinical psychology
ADVET	American Veterinary Medical Association: associate degree program in animal technology	COPSY	American Psychological Association: counseling psychology
ANEST	American Association of Nurse Anesthetists, Council on Accreditation: nurse anesthesia	CYTO	American Medical Association, Committee on Allied Health Education and Accreditation: cytotechnology
APCP	American Medical Association, Committee on Allied Health Education and Accreditation: assistant to the primary care physician	DA	American Dental Association, Commission on Accreditation of Dental and Dental Auxiliary Programs: dental assistant
ARCH	National Architectural Accrediting Board: architecture	DENT	American Dental Association, Commission on Accreditation of Dental and Dental Auxiliary Programs: dentistry
ART	National Association of Schools of Art, Commission on Accreditation and Membership: art	DH	American Dental Association, Commission on Accreditation of Dental and Dental Auxiliary Programs: dental hygiene
AUD	American Speech, Language, and Hearing Association: audiology	DIET	American Dietetic Association: dietetics
BBT	American Medical Association, Committee on Allied Health Education and Accreditation: specialist in blood bank technology	DIETI	American Dietetic Association: dietetic internships
BI	American Association of Bible Colleges: Bible college education	DT	American Dental Association, Commission on Accreditation of Dental and Dental Auxiliary Programs: dental laboratory technician
BUS	American Assembly of Collegiate Schools of Business: business	ENG	Engineers' Council for Professional Development: engineering
CHE	Council on Education for Public Health: community health education (graduate degree)	ENGT	Engineers' Council for Professional Development: engineering technology
CHIRO	Council on Chiropractic Education, Commission on Accreditation: chiropractic education	FIDER	Foundation for Interior Design Education Research: interior design education; professional and technical programs
CHPM	Council on Education for Public Health: community health, preventive medicine (graduate degree)	FOR	Society of American Foresters: forestry
		FUSER	American Board of Funeral Service Education: funeral service education

HSA	Accrediting Commission on Education for Health Services Administration: health services administration	MFCC	American Association for Marriage and Family Therapy Education, Commission on Accreditation for Marriage and Family Therapy: marriage and family counseling (clinical)
HT	American Medical Association, Committee on Allied Health Education and Accreditation: histologic technician	MFCD	American Association for Marriage and Family Therapy Education, Commission on Accreditation for Marriage and Family Therapy: marriage and family counseling (graduate degree)
IPSY	American Psychological Association: internships in clinical and counseling psychology	MICB	American Academy of Microbiology, Committee on Postdoctoral Educational Programs: microbiology
JOUR	American Council on Education for Journalism, Accrediting Committee: journalism	MLTAB	Accrediting Bureau of Health Education Schools: medical laboratory technician
JRCB	Association of Independent Colleges and Schools, Accrediting Commission: private junior college of business	MLTAD	American Medical Association, Committee on Allied Health Education and Accreditation: medical laboratory technician (associate degree)
LAW	American Bar Association, Section of Legal Education and Admissions to the Bar: law	MLTC	American Medical Association, Committee on Allied Health Education and Accreditation: medical laboratory technician (certificate)
LIB	American Library Association, Committee on Accreditation: librarianship	MRA	American Medical Association, Committee on Allied Health Education and Accreditation: medical record administrator
LSAR	American Society of Landscape Architects: landscape architecture	MRT	American Medical Association, Committee on Allied Health Education and Accreditation: medical record technician
MAAB	Accrediting Bureau of Health Education Schools: medical assistant	MT	American Medical Association, Committee on Allied Health Education and Accreditation: medical technologist
MAC	American Medical Association, Committee on Allied Health Education and Accreditation: medical assistant	MUS	National Association of Schools of Music: music
MED	American Medical Association and Association of American Medical Colleges, Liaison Committee on Medical Education: medicine	NATTS	National Association of Trade and Technical Schools: associate and baccalaureate degree programs
MEDB	American Medical Association and Association of American Medical Colleges, Liaison Committee on Medical Education: basic medical science		

NMT	American Medical Association, Committee on Allied Health Education and Accreditation: nuclear medicine technologist	RAD	American Medical Association, Committee on Allied Health Education and Accreditation: radiologic technologist
NUR	National League for Nursing: baccalaureate and higher degree program in nursing	RSTH	American Medical Association, Committee on Allied Health Education and Accreditation: respiratory therapist
OPT	American Optometric Association, Council on Optometric Education: optometry	RSTHT	American Medical Association, Committee on Allied Health Education and Accreditation: respiratory therapy technician
OSTEO	American Osteopathic Association, Office of Osteopathic Education: osteopathic medicine	RTT	American Medical Association, Committee on Allied Health Education and Accreditation: radiation therapy technologist
OT	American Medical Association, Committee on Allied Health Education and Accreditation: occupational therapy	SCPSY	American Psychological Association: school psychology
PH	Council on Education for Public Health: public health	SP	American Speech, Language, and Hearing Association: speech pathology
PHAR	American Council on Pharmaceutical Education: pharmacy	SRCB	Association of Independent Colleges and Schools, Accrediting Commission: private senior college of business
PNE	National Association for Practical Nurse Education and Service: practical nursing	SURGT	American Medical Association, Committee on Allied Health Education and Accreditation: surgery technology
PNUR	National League for Nursing: practical nursing	SW	Council on Social Work Education, Commission on Accreditation: social work
POD	American Podiatry Association, Council on Podiatry Education: podiatry	TED	National Council for Accreditation of Teacher Education: teacher education
PTA	American Physical Therapy Association, Committee on Accreditation in Education: physical therapist	THEOL	Association of Theological Schools in the United States and Canada: theology
PTAA	American Physical Therapy Association, Committee on Accreditation in Education: physical therapist assistant	VET	American Veterinary Medical Association: veterinary medicine
RABN	Association of Advanced Rabbinical and Talmudic Schools, Accreditation Commission: rabbinical and Talmudic education		

Nationally Recognized State Agency -

The following agency is listed by the U.S. Secretary of Education for its registration (accreditation) of collegiate degree-granting programs or curriculums offered by institutions of higher education.

NY New York State Board of Regents

NOTE: Addresses of the recognized accrediting agencies and associations listed above can be found in Appendix C.

"3IC" indicates that the institution qualified for listing via the three-institutional certification procedure.^{1/}

The U.S. Department of Education does not accredit, recommend, or approve any school or educational institution.

Preaccredited Status

The award of preaccreditation status to an institution or program signifies that the accrediting agency or association has determined that the institution or program is progressing toward accreditation. It does not guarantee that the educational institution or program will be accredited. Certain accrediting agencies and associations may award preaccreditation status to an institution or program that is not fully operational.

The U.S. Secretary of Education recognizes certain preaccreditation statuses established by the nationally recognized accrediting agencies and associations. In order for a preaccreditation status to be listed as recognized by the Secretary, an accrediting agency or association must demonstrate that it uses criteria and procedures for the award of preaccredited status that are appropriately related to those used for award of accreditation status.

The regional accrediting commissions listed in this Directory each award the recognized preaccreditation status of Candidate for Accreditation.

The recognized preaccreditation categories used by the New York State Board of Regents are Interim Registration and Preliminary Registration.

The national institutional and specialized agencies use varying terminology to represent that an institution or program is preaccredited. The following is a list of the recognized preaccreditation statuses for these agencies:

American Association of Bible Colleges,
Commission on Accrediting - Candidate
for Accreditation

American Association of Nurse Anesthetists,
Council on Accreditation - Preaccredi-
tation

American Council on Pharmaceutical
Education - Candidate

American Dental Association, Commission
on Evaluation of Dental and Dental
Auxiliary Programs - Accreditation
Eligible

American Dietetic Association, Commission
on Evaluation of Dietetic Education -
Developmental Accreditation

American Optometric Association, Council
on Optometric Education - Reasonable
Assurance, Preliminary Approval

American Osteopathic Association - Pre-
accreditation Status, Provisional
Accreditation

American Podiatry Association, Council
on Podiatry Education - Reasonable
Assurance, Preliminary Accreditation

American Veterinary Medical Association,
Council on Education - Reasonable
Assurance of Accreditation

¹ See "Criteria for Listing in this Directory" on page vii.

Association of Advanced Rabbinical and Talmudic Schools, Accrediting Commissions - Correspondent, Candidate

Association of Independent Colleges and Schools, Accrediting Commission - Recognized Candidate Status

Association of Theological Schools in the United States and Canada, Commission on Accrediting - Authorization of Self-Study

Council on Chiropractic Education, Commission on Accreditation - Recognized Candidate for Accreditation

Council on Education for Public Health - Preaccreditation

Council on Social Work Education, Commission on Accreditation - Candidacy

Engineers' Council for Professional Development, Engineering Technology Committee - Candidate for Accreditation, Reasonable Assurance of Accreditation

Liaison Committee on Medical Education - Reasonable Assurance, Provisional Accreditation

National Association of Schools of Art, Commission on Accreditation and Membership - Candidacy Status

Arrangement of Data

Generally, institutions are listed alphabetically under the States in which they are located. A branch of an institution is listed as a unit following the parent institution. When there are two or more branches, the branches are listed alphabetically. When an institution comprises two or more campuses reporting directly to the central administration, the campuses are listed in alphabetical order. Generally, components of multicampus institutions are subsumed under a "central office". Thus, an identification code, as well as a name and address, is provided for the institution as a whole in addition to the individual campuses.

Most multicampus institutions reported information on the overall administrative staff, but when this was not done, the name of the chief administrative officer of the institution (such as the president or chancellor) and his/her business address are listed.

In all surveys and publications related to the Higher Education General Information Survey (HECIS), institutional systems, multicampus institutions, main campuses, and branch campuses are defined as follows:

Institutional System. A complex of two or more institutions of higher education each separately organized or independently complete, under the control or supervision of a single administrative body.

Multicampus Institution. An organization bearing resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses attached to it.

Main Campus. In those institutions consisting of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office of such an institution is reported to be at a different location, the main campus is also the location of the central administrative office.

Branch Campus. A campus of an institution of higher education that is organized on a relatively permanent basis (i.e., has a relatively permanent administration), that offers an organized program or programs of work of at least 2 years (as opposed to courses), and that is located in a community different from that in which its parent institution is located. Being in a community different from that of the parent

means that a branch is located beyond a reasonable commuting distance from the main campus of the parent institution.

Institutions that are part of a system are grouped alphabetically immediately following the name and the administrative staff of the system. If a system requested an order other than an alphabetical listing, the request was honored. For example, a system that has universities, 4-year colleges, and junior colleges may have requested an alphabetical listing with each level of institution. The name of each branch of an institution or an institution in a system of institutions is preceded by an asterisk (*).

Explanation of Data

FICE Identification Code

The Federal Interagency Committee on Education (FICE) identification code is listed for each institution. This is an unstructured number used for statistical purposes that is unique for each institution. Except as indicated below, it will remain as the institutional identification number for the life of the institution; should the institution cease to exist, the number will be inactivated.

The primary utility of the FICE identification code is the precise identification of a particular institution of higher education. In addition to this primary use, for purposes of computer records and processing, a FICE identification code is assigned to the aggregate or totality of a multicampus institution or an institutional system. The FICE identification code number is known (somewhat imprecisely) as the "all-campus" number for a multicampus institution or the "all-institution" number for an institutional system. This number permits the National Center for Education Statistics, in the analysis of data, to code the aggregate data for multicampus institutions or systems of institutions. A list of these aggregates and the FICE identification code for each of them is given in Appendix H.

There are apparent, but not real, exceptions to the immutability of the FICE identification codes. These apparent exceptions occur when institutions acquire or establish new branches, when established branches are closed or lose branch status, or when institutions are assembled into new systems. Some examples of these exceptions follows:

1. An institution has a remotely located component that for many years it did not consider a branch. Now it accords a separate identity as a branch to this component. New FICE identification codes now are given to the main campus and to the branch; the old FICE identification code assumes a new identity as the "all campus" code for the total entity. In this way, the historical consistency of the statistical data filed by the FICE identification code is maximized.
2. An institution acquires a newly developed and established branch. The old name of the institution now applies both to the old institution and to its new branch. The old FICE identification code is now used to designate the main campus (which is actually the quantitative successor to the old institution); but the new FICE identification codes are assigned to each of the following: the branch, the central office, and the institutional "all-campus" aggregate.
3. An institution closes an established branch. The main campus, which will now be a single institution, retains its FICE identification code. However, if an established branch loses branch status but is still a component, the now single-campus institution assumes the "all-campus" FICE identification code.

previously independent institution becomes part of a newly organized system that contains a number of institutions, and the system assumes the name of the previously independent institution. If an analysis of the change demonstrates that historical consistency of statistics will not be served by preserving old FICE identification codes, some units and aggregates of this new system will receive totally new FICE identification codes, and the old code of the institution will not be used to identify the new system. This will appear to be a change in FICE code; actually it is not since the name now describes a new and different entity. On the other hand, if historical consistency and understanding of the data would be served by preservation of the old FICE identification code, it may be preserved by having it now designate that part of the system that previously had the old name.

Entity Number

An entity number is a 12-character code assigned by the Department of Education Central Registry System to identify individuals and organizational entities conducting business with the Department and for storage and retrieval of basic information which characterize these entities. It is presented in this Directory as a service to those users of the Higher Education General Information Survey (HEGIS) data who have this 12-character code as their primary identification code. It is shown as verified by an institution as part of the HEGIS Institutional Characteristics Survey.

An entity number is composed of three parts. The first digit is the Identification Code Designator (ICD) prefix; for all colleges and universities it is "1" denoting an organizational entity. The next nine digits are the Employer Identification Number (EIN). This identifies an organization by the Employer Identification Code assigned by the Internal Revenue Service (IRS) or the pseudo number assigned by the Central

Registry staff to an organization that does not qualify for an EIN under IRS procedures. Pseudo numbers assigned to organizations in outlying areas are permanent. The last two characters, always a letter followed by a number, form the EIN suffix that identifies a particular component of the organizational entity, e.g., branch of an institution.

Date of Establishment

The date of establishment is the year in which the institution came into existence or was chartered. In the event that an organizational change (i.e., merger with another institution) has taken place since that time, the earlier date is used.

Student Body

The sex designation for the student body of each institution or campus included in the Directory is shown as men, women, coeducational, or coordinate (separate colleges for men and women) as reported by the institution.

Several institutions, traditionally for men only or women only and so listed in the Directory, indicated on their reports that, although their enrollments were almost all of one sex, they had an open-door policy for students of either sex. A few added the phrase "on a commuting basis only." Several noted that the reported enrollment included a given number of men or women day students.

Enrollment

The total enrollment of students in each institution or, in the case of multicampus institutions, in each component is given as of fall 1979. Undergraduate and graduate, first-professional, unclassified, full-time and part-time students are included. Excluded are students in non-credit adult education courses; students taking courses at home by correspondence, radio, or television; students enrolled only for "short courses"; auditors; students studying abroad; and students enrolled at a branch campus or extension center of an American institution in a foreign country.

shown in this Directory may differ from the figure presented in the opening fall enrollment publication. The opening fall figure is reported early in the fall term, and respondents are asked to include estimates for any group of students that should be included but for which an actual count is not available.

An advance enrollment figure for fall 1980 (indicated by a dagger to the right of the figure) was obtained for newly eligible institutions which did not report fall 1979 enrollment.

Undergraduate Tuition and Fees

Undergraduate tuition and required fees are the actual charges reported by the colleges and universities and their branches for the academic year 1980-81, not including room and board charges. All fixed-sum charges, which are required of such a large proportion of all students that the student who does not pay the charge is an exception, are included. If the amount varies depending upon the class level of the student, subject-matter major, or courses taken, etc., the typical or modal amount is estimated for charges which are required. Charges which are clearly optional are not included.

Control or Affiliation

The control or affiliation of each institution is recorded as reported by the institution. Public institutions are those under Federal, State, State-related, local, or State and local control. Private institutions are reported as independent, nonprofit; organized as profitmaking; or affiliated with a religious group. Affiliation need not imply financial support. Provision was made for reporting affiliation with 70 religious groups and an "other" category was provided for affiliation not covered by the specific groups named.

Calendar System

The calendar system on which each institution or campus operates is reported as quarter, semester, trimester, 4-1-4 (months) plan, or "other". Any calendar system not classifiable as quarter, semester, trimester, 4-1-4 is designated "other".

Highest Level of Offering

The following categories have been established to designate institutions by highest level of offering:

Two but less than four years--refers to at least 2 but less than 4 years beyond 12th grade; includes junior colleges, community colleges, technical institutes,

and normal schools offering at least a 2-year program of college-level studies, either leading to an associate degree or wholly or principally creditable toward a baccalaureate degree.

Four- or five-year baccalaureate--includes those institutions offering programs of studies leading to the customary bachelor of arts or bachelor of science degree, requiring at least 4 but less than 6 years.

First-professional degree--includes those institutions that offer the academic requirements for selected professions based on programs that require at least 2 academic years of previous college work for entrance and a total of at least 6 years of college work for completion; e.g., medicine (M.D.), law (LL.B., J.D.), theology (B.D., M.Div., Rabbi), dentistry (D.D.S.), veterinary medicine (D.V.M.), osteopathic medicine (D.O.).

Master's--includes those institutions offering the customary first graduate degree, master of arts or master of science degree in the liberal arts and sciences, or the next degree in the same field after the first-professional degree; e.g., Master of Science in Surgery (M.S. in Surgery), Master of Laws (LL.M.), and Master of Science in Dentistry (M.S.D.).

Beyond master's but less than doctorate--includes those institutions offering "postgraduate predoctoral degrees"; e.g., civil engineer, electrical engineer, specialist in education.

Doctorate--includes those institutions offering the Ph.D. or its equivalent in any field; e.g., Doctor of Education, (Ed.D.) Doctor of Juridical Science, (S.J.D.), and Doctor of Public Health (D.P.H.).

Undergraduate non-degree-granting--includes those institutions offering at least 4 years of undergraduate work but not conferring a bachelor's degree. Such institutions may give diplomas, certificates of completion, or similar awards.

Graduate non-degree-granting--includes institutions offering work beyond the bachelor's level but not conferring

degrees. In some instances the degrees are conferred by cooperating institutions.

Postdoctoral research only--includes institutions operating solely for the purpose of research at the postdoctoral (post-Ph.D. or equivalent) level.

Type of Program

The designations of the types of programs are explained as follows:

Terminal-occupational below bachelor's--refers to programs of at least 2 but less than 4 years beyond high school designed to provide students with knowledge and skills necessary for immediate employment but for which credits are not ordinarily acceptable toward baccalaureate degree programs.

Two-year principally bachelor's creditable--refers to the first 2 years of college work, i.e., the equivalent of the freshman and sophomore years of the lower division of a bachelor's degree program. Such a program may be general or preprofessional; it may serve as the first 2 basic years toward a bachelor's degree in a liberal arts program, in a teacher preparatory program, or in a professional program.

Liberal arts and general--refers to 4- or 5-year baccalaureate or post-baccalaureate degree programs in the liberal arts and sciences. It may also include preprofessional programs (such as prelaw, prelibrary science, presocial work, and premedicine).

Teacher preparatory programs--as used here, must be of at least 4 years duration.

Professional programs--as used here, are separate programs of at least 4 years beyond high school, outside liberal arts and organized around a professionally oriented academic discipline. Included are 4- or 5-year degree programs in agriculture, business administration, engineering, etc., as well as those programs leading to the 6-year-or-more first-professional degree defined in the section on highest level of offering.

Administrative Officers

The instructions that accompanied the survey form requested institutions to list only the chief administrative officers; i.e., to limit the list of staff members to key persons. Persons holding two positions concerned with the same area of responsibility (e.g., business manager and comptroller, or treasurer and comptroller) were to be listed only in the higher position. Persons performing more than one function were to be listed only once in the most important function or a combination of functions (such as registrar and admissions officer). The only instance in which a person was to be listed twice was when a chief administrative officer served also as the dean/director of a school, college or division of the institution.

Not all reported officers and titles can be listed in the Directory in every instance, due to limitations of institutional entry space and publication size. Every effort is made to list as many functional codes and institutional officers as may be required by Directory users.

Assistant deans reported were retained if their functions were not duplicated. For example, a number of institutions reported a dean of students and, in addition, the dean of women as an assistant dean or assistant dean of women. Also, some institutions reported one of their chief administrative officers as dean of the college and all other administrative deans as assistants with specific functions, such as assistant dean for student affairs.

Assistant deans were deleted if the function was duplicated. For example, when both a dean and an assistant dean of the college of arts and sciences were reported, the assistant dean was deleted.

It will be noted that a numeric coding precedes the title of all administrative staff. This coding refers to a specific functional description of an administrative officer in a college or university, without regard for the actual title. Thus, whether the chief business officer

has the title of vice president for business, or treasurer, or comptroller, or business manager, the code number is 10. This permits these data to serve an additional purpose for those who utilize the Directory in the form of a computer tape, and also provides more specific information on the areas of responsibility of the various officers.

The code numbers and the generic descriptions of administrative functions are drawn from A Manual for Budgeting and Accounting for Manpower Resources in Post-secondary Education by Dennis P. Jones, National Center for Higher Education Management Systems at the Western Interstate Commission for Higher Education and Theodore H. Drews, National Center for Education Statistics.

There is one case in which the numeric coding lacks precision. Where a position is coded 00, this means that the position and the functions of its incumbent are not included in the reference manual, but the position was deemed to be of such importance that listing was required.

The instructions for the survey form stipulated that vacant positions be omitted except for such key positions as Chief Executive Officer (01), Chief Executive Officer within a System (02), Executive Vice President (03), Chief Academic Officer (05), Chief Business Officer (10), Chief Librarian (08), Deans/Directors (47-75), Director, Admissions (07), Registrar (06), and Chief Student Officer (32). When other than the usual key positions were reported as vacant, they were not listed.

Deans of schools and colleges within an institution are shown after the administrative officers, except when an institution requested a different order or rank sequence.

Methodology

The request for information to be published in this Directory was included in the Higher Education General Information Survey (HEGIS) package mailed to institu-

tions of higher education or to State agencies that cooperate with the National Center for Education Statistics in data collection, in summer 1980. Copies of the form "Institutional Characteristics of Colleges and Universities" were included in the package sent to those institutions that had not been listed in the Directory in the previous year. Institutions included in the Directory the previous year received a computer printout of their information, with the request that it be updated for 1980-81.

The National Center for Education Statistics has a cooperative data collection arrangement with 44 States. In 38 of these States, State officials handle mail-out and data collection for all institutions; in 6 States, for selected institutions. In 4 other States, with which NCES has no cooperative data-collection arrangement, an extra copy of each form to be completed and mailed to the State department of education is included in the packages mailed to specific institutions. This cooperative arrangement reduces the number of requests for data made upon the institutions and improves the response rate for the various portions of the package. Inconsistencies in the completed reports are resolved by contacting the State coordinating officials who in turn contact the institutions when necessary.

Institutions were requested to provide an immediate response, and data collection was completed November 21, 1980.

In order to expedite publication of this Directory, corrections were no longer accepted after November 21. Due to this earlier date, we regret that certain institutions contained herein were not updated. These institutions have been designated in the body of the Directory by the symbol + preceeding the full institution name. It is to be noted that since the Division of Eligibility and Agency Evaluation (DEAE) has sole responsibility for verification of accreditation, all accreditations, even for schools that have not reported, are valid and current.

Institutions not previously included that had applied for Directory listing and that had already filed Institutional Characteristics information were included if they were certified as eligible for listing at any time prior to the closeout of data collection on November 21, 1980.

Each report was sent to the DEAE for certification of the institution's eligibility for listing in the Directory and for verification of the accreditation reported.

Only those institutions certified by DEAE as eligible for listing (i.e., certified as meeting at least one of the criteria specified on page vii of this publication) are included.

Abbreviations

Whenever it was impossible to spell out the functional titles of administrative officers within the limit of the 30 characters allowed, standard abbreviations were used. All abbreviations are listed in Appendix G.

Symbols

(For Accreditation Only)

The symbol # preceding any of the abbreviations listed under the Nationally Recognized Agencies and Associations on Page x indicates that the accrediting agency has stated publicly that the institution or program is provisionally accredited, accredited with some reservations, or approved on probation. The symbol @ indicates that the institution or program has attained a preaccredited status that has been recognized by the Secretary of Education. The symbol & indicates the institution is covered under the regional accreditation of the parent institution.

Index

All institutions of higher education included in this Directory are listed in alphabetical order in the index. Users should refer to this listing to determine if a particular institution is included. In some cases of name changes or institutions which have been dropped since the 1979-80 Directory, appropriate page references are given. On page xiii, under Arrangement of Data, the various exceptions to straight alphabetic listing are explained.

INSTITUTIONS BY STATE*

* Includes District of Columbia and, separately, U.S. Service Schools, American Samoa, Former Canal Zone, Guam, Puerto Rico, Trust Territory of the Pacific Islands, and the Virgin Islands.
